Reservations cancelled within 72 hours (6 days) will be subject to a restocking fee of 25% of rental equipment reserved. I agree that Island Bike Company Inc. will give every cancellation fee careful consideration. I understand all reservation cancellations are important to Island Bike Company Inc. so they can manage the rental inventory.

Rental Equipment Operation Info

A. Hand Brakes: Your bike is equipped with a front and rear hand brake. To engage your rear brake, simply squeeze the right brake lever. To engage your front brake, squeeze the left brake lever. Take note that over-pressuring the front brake may result in lock-up of the front wheel. I understand that a front wheel lock-up may send the bike into a frontflip or skidding crash. Also when the handlebars are turned all the way around clockwise or counterclockwise may result in a front and rear wheel lock-up. So in short make sure if the equipment has fallen over before you ride the rental bike check the front and rear brakes and make a visual check of the brake cables. Hence, use the rear brake as primary means of slowing the bike in a controlled manner. If your bike does not have hand brakes it will have foot actuated brakes, foot brakes are installed on all size bikes. To apply the foot brake gently pedal backwards and apply enough pressure to slow the bike down eventually bringing it to a stop.

B. Shifting Gears: Your bike may also be equipped with one or two shifters, located on the right and left sides of your handlebars, on road bikes, they are

intergrated into the brake levers as a brake/shifter combo The right shifter controls the rear derailleur(gears). Shifting the rear gears results in small incremental changes in your gear ratio and is used more ofton than the front derailleur. The front derailleur is controlled by the left shifter and makes much larger changes in the gear ratio than the rear derialleur.

C. Pedals: Your pedals may be equipped with toe clips(straps) or clip in pedals(clipless). Clipless pedals are used to increase power transfer to the bike and need special shoes. Toe clips are designed to cinch the foot to the pedal and can be worn as loose or as tight as you perfer. Please understand that a toe clip strap requires loosing before the foot can be removed, thus anticipating your stop as your shoe needs to be dicoonnected from the pedal. Island Bike Company Inc. will provide any pedal instrution.

D. Wheels: Your bike may be equipped with quick releases for both front and bake wheeles. The quick releases allow you to remove the wheels. Make sure all quick releases are tight prior to ou ride. Island Bike Company Inc. will provide any pedal installation needed.

E. Seat: The bike will be equipped with a proper seat for the bike model. The seat hight adjustment is adjusted by a quick release which no tool is required to adjust. In the event that your bike does not have a quick release it will need an allen wrench to adjust, which Island Bike Company Inc. will supply and or adjust. No tools will be loaned you must ask a Island Bike Company Inc. agent to adjust the seat.
